Becoming a volunteer in Environmental club at college is a great way to learn and energized about taking care of our environment and helping communities while learning about some of the most important environmental issues facing the world in the 21st century.

The college Eco Club's task is to make everyone at the college understands the importance of a sustainable way of life and to act accordingly. Club members would help to reduce the ecological footprint of the college.

Much can be achieved by improving the college building's energy efficiency, development of green wall, improving eco-friendliness, and helping with other innovative waste management and recycling techniques.

It is also very important to talk about why it is a good idea to change your ways, and to inspire everyone to take part!
